

AI TRAINING

AI Fundamentals with DeepSeek

-  Tuesday, April 8th
-  8:00 am to 11:30 am
-  English
-  CCI FRANCE CHINE Beijing Office
-  Offline

Chapter 1: Fundamental Principles

Types of Generative AI: what Generative AI can do, different variants

Basic Principles: Proper usage of GenAI tools, setting the foundation for the later more complex modules

Common Scenarios: Learning from actual cases to understand what is considered good use cases

The Art of Prompt: It's not complicated with the right framework – this is one of the keys to your success

Chapter 2: Level 1 The Art of Prompt

ERCFC model: The power of thoughts, translated into RCFC framework, a powerful tool not widely explored in other courses

Positive Examples, Negative Examples: Understand the reason to failures is the first step to success

Practice with DeepSeek V3

Chapter 3: Level 2 Chain of Thoughts & Reasoning Models

Examples: when it is easier to show than to explain

CoT: Leveraging LLM's Strategic analysis competencies

Reasoning Model: DeepSeek R1, how does it work? Why is it so different?

Practice with DeepSeek V3 and R1

Chapter 4: Business Application

Introduction to Integration Business Case: What can be achieved in the mindset of improving the efficiency of a workflow to the overall operation efficiency instead of improving the speed of a singular task at hand

Prompt Chaining: practical case to use Text, Image, Video, Audio, Voice AI in one workflow

Risks and Potential of generative AI for Enterprise Applications: It requires more strategic thinking and risks regulation by starting from equipping your company with the right mindset and the right people

Who can attend?

Any individual or corporate interested on leveraging GPT to improve their efficiency.

Training Details

Date :

Tuesday, April 8th
