

Integration Engineer

Location: Shanghai

Company

Our client is Europe's leading provider of Salesforce and MuleSoft services. They are recognized for offering high value-added operational consulting services, and for combining business and technology expertise to help our customers unlock their technological potential.

Supporting major groups in the luxury, industry or finance sectors, our client is growing strongly since their creation in 2018. Their team of 200 experts is spread around the globe.. with a physical presence in Hong Kong, Shanghai, Luxembourg our headquarters, and also in Paris, Geneva, Lisbon, Cosenza, Milan, Munich.

Job Responsibilities:

Above all, we are looking for someone who's passionate about IT and likes to share their knowledge with their team! You will be entrusted with a variety of missions:

- Design and develop APIs in multiple protocols and standards to satisfy our customer needs
- Actively participate to the analysis and integration of MuleSoft platform for our clients
- Help with the setup of the major technical components necessary for a smooth project delivery (Environments, VPN, BitBucket, git, Maven, ect.) while complying with the security best practices.
- Participate in clients' workshops on integration (security, continuous integration, performance, ect.)
- Ensure the delivery of quality developments for our clients through technical audits and controls.
- Ensure applications, services, batch jobs are up & running during SLA hours.
- Respond to alerts and / or tickets that are either auto-generated or created by the users.

Requirements:

- Strong analytical and problem-solving skills.
- You know what is a RESTfull API
- You are at ease with Json/JsonSchema and XML/XSD
- You got a good understanding of common used protocols (HTTP, FTP, SMTP)
- Basic knowledge of the OSI model, and internet technologies
- Basic understanding of network monitoring concepts and management tools
- Able to collate and interpret data from various sources
- Capable of multi-tasking, good time management and prioritization of workload.
- Willing to learn and develop new skills.
- You have good communication skills in English and Chinese (written and oral)
- You are a pragmatic, flexible, proactive, structured and quality-oriented team player
