

Chapter 1: Fundamental Principles

Misconceptions: Avoiding misuse of GenAI products, first step of risks mitigation,

Basic Principles: Proper usage of GenAI tools, setting the foundation for the later more complex modules.

Common Scenarios: Learning from actual cases to understand what is considered good use cases

Prompt Engineering: It's more complicated than you thought – could be one of the keys to your project's success

Chapter 2: Level 1 prompt engineering

RCFC model: The power of thoughts , translated into RCFC framework, a powerful tool not widely explored in other courses.

Positive Examples, Negative Examples: Understand the reason to failures is the first step to success

Practice

Chapter 3: Level 2 Chain of Thoughts

CoT: Leveraging LLM's Strategic analysis competencies

0/1/n shot prompts: Tuning the model without the need for a large amount of data-set

Practice

Chapter 4: Level 5 Business Application (preview)

Introduction to Integration Business Case: What can be achieved in the mindset of improving the efficiency of a workflow to the overall operation efficiency instead of improving the speed of a singular task at hand

Elements to consider for Corporate Implementations

Risks and Potential of GPT for Enterprise Applications: It requires more strategic thinking and risks regulation by starting from equipping your company with the right mindset and the right people.

Who can attend?

Any individual or corporate interested on leveraging GPT to improve their efficiency.
