

# Industrialization Engineer

**Location:** Dongguan

**Starting date:** ASAP

**Job Reference:** CDS - 2024 - 052

**Candidature Preference:** French profiles

## ABOUT THE COMPANY

Our client is a French consulting and services company assisting European companies with their industrial and commercial development in China.

## RESPONSIBILITIES

- The duration of the assignment is estimated at between 6 and 12 months.
- Initially, the selected candidate will be trained in the French site for an estimated period of 1 month. Once trained, this person will supervise the installation of the equipment (machines) in China and train the Chinese operators recruited.
- If the CTO of the Chinese site has already been recruited, the industrialization engineer will work with the recruited CTO.
- Throughout the assignment, the Industrialization Engineer will liaise with the Industrialization Manager in France.
- Depending on requirements, the Industrialization Engineer may be asked, in consultation with the France Industrialization Manager, to supplement his or her technical expertise by returning to the French site for a few days.
- This mission involves a high level of safety, requiring compliance with strict rules linked to the requirements of safety standards.

## REQUIREMENTS

1/ Essential Qualifications- General:

- Solid technical background.
- Have already started up an industrial production site.
- Good command of office software, particularly Excel.
- Fluency in English.
- Good interpersonal skills.
- Leadership.
- Ability to work independently.
- Ability to work as part of a team.

With over 10 years of experience, CCI FRANCE CHINE Recruitment Department supports companies in their recruitment needs and helps candidates find a professional opportunity across China.

- Team building.
- Ability to meet deadlines.

## 2/ Specific -Techniques and experience:

- Previous involvement in the commissioning of production machines (participation in machine SATs).
- Good experience of roll-to-roll production.
- Must have started up and operated roll-to-roll coating/printing machines.
- Sound knowledge of rotogravure coating and/or rotogravure printing and/or flexographic printing.
- Experience in converting plastic films (PET, BOPP, PE) would be a plus.
- Document all the results and observations from the product qualification tests (test sheets, specific measurements).
- File the samples taken during the tests.
- Participate in the analysis of results.
